**RE: Kansas SFY 2009 Playground Surface/ Waste Tire Product
Grant Program - Certification of Installation**

Organizations asking for over \$10,000 in grant funding submitted a construction quality proposal with the grant application, which identified a quality officer and the qualifications of that person. The quality officer must complete this certification.

_____ **The materials received and installed match the waste-tire derived product that was tested** to meet ASTM 1292-04 (Head Impact - critical fall height criteria) and ASTM F1951 (Standard Specification for Determination of Accessibility to Surface Systems Under and Around Playground Equipment) as listed by name on KDHE's approved products and vendor list for SFY 2008 grants.

_____ **The materials and installation of this playground surfacing conforms to Consumer Product Safety Commission guidelines for Public Playground Safety** (Publication 325)

_____ **This waste-tire derived product was installed according to the manufacturer's specifications and installation guidelines**

I, _____ with _____, was onsite during all construction activities related to the tire derived product at _____ in _____ and certify with my initials that each of the above statements are true.

Permitting and Regulatory Considerations

- The product manufacturer will be responsible for all warranty claims.
- The product supplier will be responsible for any installation training or guidance to warn users of any hazards or installation pitfalls.
- Projects will be assessed for compliance with all applicable KDHE permitting and regulatory requirements.
- Installations of uncoated, all-black playground surface material will be required to have signage to warn users of the hazards (heat conditions and loose or dirty particles).
